

23 November 1964

MEMORANDUM FOR: Mr. Blake

1. Bureau of the Budget had a question on this item regarding similarity of the proposed work with that being done by Dr. Tietjens and TSD.

2. Roy Burley of OBPAM has queried Plans and Programs regarding details, saying that he was anticipating it as a question in further meetings between Agency and BOB personnel, including the Director. In short, he would like to get the details of the program from OSI and all matters of coordination squared away.

25X1 3. [] advises that there has been little coordination of this program with the Medical Staff and TSD and that he fully expects a head-on clash with one or both of these units. He regards their work as inputs to his total research effort but at the present time knows nothing of the quantitative or qualitative results of these offices. He expects to start a coordinating action when Dr. Tietjens returns from the Far East in a week or so.

25X1 4. This program is budgeted [] in FY 65 and [] in FY 66--token amounts but enough to launch the project and make them competitive with larger amounts in TSD (rumored to be [])
